## Profile

A Passionate Associate with over 1.8 years of experience in developing java web applications, and supporting with client's data analysis and requirements. Have good Communication Skills and truly collaborative, looking towards key participation in team-oriented task and immediate challenges. Have achieved effective system designs for each business requirement. Will be interested to learn new technologies when it's expected from me. I am confident that if given the opportunity, I will be able to contribute for the organization's growth and mine.

## Work Experience

- Oct 2023- Present  
Cognizant technology service  
Jr software engineer
- Worked on both the front-end UI development and backend java development With almost all the modules in the NATS application.
- During the 1st Year I had been assisting in Working COTC certificate of training completing search and ACRF Regenerate generation
- Worked on lots of Data request from the Client, thus improving my MySQL skill.
- Helped Client and fellow developers to troubleshoot the issue and resolve it.
- Trained New joiners on aspects like, understanding the Java coding flow and how to do the deployment of the upgraded codebase in test and prod server
- Given KT Regarding the modules of the project to Client officers

## Projects

### BOAT (Board of Apprenticeship Training)

National Apprenticeship Training Scheme - Government of India (Ministry of Education)

Project deals with the enhancement and development of new modules for the NATS web portal. The NATS (National Apprenticeship Training Scheme) is one of the major program from Government of India for Skilling Indian Youths. The NATS portal helps the students of India to obtain apprenticeship and training for a period of maximum 1 year. Currently, it has helped more than 20+ lakhs students in getting the industrial experience with their desired establishments.
